

**FIFRA Section 2(ee)  
Recommendation**

**This recommendation is made as permitted by Section 2(ee) of FIFRA, as amended, and has not been submitted to or approved by the U.S. Environmental Protection Agency.**

**Please contact your Certis USA regional sales manager to determine the specific requirements for FIFRA 2(ee) recommendations in your respective state.**

**Jackpot<sup>®</sup>WP**  
BIOLOGICAL NEMATOCIDE

EPA Reg. No. 70051-99

**ACTIVE INGREDIENT:** *Bacillus thuringiensis* subspecies *aizawai* strain GC-91 solids, spores and Lepidopteran active toxins\*: 50.0%

**OTHER INGREDIENTS:** 50.0%  
**TOTAL:** 100.0%

\*The percent active ingredient does not indicate product performance and potency measurements are not federally standardized.

**DIRECTIONS FOR USE**

**It is a violation of federal law to use this product in a manner inconsistent with its labeling.**

**PEST**

For control of light brown apple moth (LBAM), *Epiphyas postvittana*

Apply when newly hatched larvae appear and before leaves are rolled or webbing is significant. Continue applying as part of a normal spray program until pest is adequately controlled. Apply when caterpillars are actively feeding. To be effective, Jackpot WP spray must be deposited at the larval feeding site. Jackpot WP can be applied by ground or air in water sufficient to insure thorough and even coverage. Thorough and uniform crop coverage is required for adequate insect control. Applications at higher water volumes have demonstrated improved control of targeted pests. Early morning or evening applications, when air is calm, are generally best for aerial applications.

**All applicable directions, restrictions, and precautions on the EPA-registered labels are to be followed.** This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and observe the cautionary statements plus all other information appearing on the product labels. **For Utah and Washington, this recommendation is not required to be in the possession of the user at the time of pesticide application. For all other states, this recommendation must be in the possession of the user at the time of pesticide application.**

BIOLOGICAL NEMATOCIDE

CROPS	RATES
Cole crops: terrestrial Chinese vegetables, terrestrial green leafy vegetables, celery	0.5 to 2.0 pounds per acre
Beans, peas	0.5 to 2.0 pounds per acre
Tomatoes, peppers	0.5 to 2.0 pounds per acre
Tobacco	1.0 to 2.0 pounds per acre
Cotton	0.25 to 2.0 pounds per acre
Terrestrial ornamentals and flowers	0.5 to 2.0 pounds per acre
Stone fruit: peaches, nectarines, plums, prunes, cherries	1.0 to 2.0 pounds per acre
Tree nuts: almonds, filberts, walnuts, pecans	1.0 to 2.0 pounds per acre
Pistachios	1.0 to 2.0 pounds per acre
Greenhouse vegetables: tomatoes, cole crops, peppers	0.5 to 2.0 pounds per acre
Grapes	1.0 to 2.0 pounds per acre
Corn	1.0 to 2.0 pounds per acre
Terrestrial small fruits and berries	0.5 to 2.0 pounds per acre
Cranberries	1.0 to 2.0 pounds per acre
Cucurbits	0.5 to 2.0 pounds per acre
Potatoes	1.0 to 2.0 pounds per acre
Soybeans	0.25 to 2.0 pounds per acre
Pome fruits: apples, pears	1.0 to 2.0 pounds per acre
Alfalfa and other forage crops	0.5 to 2.0 pounds per acre
Citrus: oranges, grapefruit, tangerine	1.0 to 2.0 pounds per acre
Sugarbeets, radish and other root crops, leaves of root and tuber vegetables	0.5 to 2.0 pounds per acre
Herbs and spices	0.5 to 2.0 pounds per acre
Peanuts	1.0 to 2.0 pounds per acre
Peppermint, spearmint	1.0 to 2.0 pounds per acre
Artichokes	1.0 to 2.0 pounds per acre
Bulb vegetables: onions, garlic	1.0 to 2.0 pounds per acre
