

**FIFRA Section 2(ee)
Recommendation**

This recommendation is made as permitted by Section 2(ee) of FIFRA, as amended, and has not been submitted to or approved by the U.S. Environmental Protection Agency.

Please contact your Certis USA regional sales manager to determine the specific requirements for FIFRA 2(ee) recommendations in your respective state.

Trilogy®

FUNGICIDE/MITICIDE/INSECTICIDE

EPA Reg. No. 70051-2

ACTIVE INGREDIENT: Clarified Hydrophobic Extract of Neem Oil: 70.0%

OTHER INGREDIENTS: 30.0%

TOTAL: 100.0%

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

CROPS

Turf grown on golf courses (fairways, greens, tee boxes, practice areas, roughs), athletic fields, sod farms, municipalities, and parks

PESTS

For the use of Trilogy when tank mixed with Neemix 4.5 insect growth regulator for the control of Anthracnose (*Collototrichum* spp.) on turf.

RATE

Apply Trilogy as 1.0% solution in sufficient amounts of water to achieve complete coverage of the foliage.

APPLICATION

Apply Trilogy (at a 1.0% solution rate) in a tank mix with Neemix 4.5 directly to turf. Use an adequate amount of water to achieve complete coverage of the foliage. Apply when anthracnose is present and coincides with the regular scheduled Neemix 4.5 application for the control of nematode species.

All applicable directions, restrictions, and precautions on the EPA-registered labels are to be followed. This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and observe the cautionary statements plus all other information appearing on the product labels. **For Utah and Washington, this recommendation is not required to be in the possession of the user at the time of pesticide application. For all other states, this recommendation must be in the possession of the user at the time of pesticide application.**
