Double Nickel

BIOFUNGICIDE

A new generation
fungicide and
bactericide.

55 Double Nickel

BIOFUNGICIDE

A new generation
fungicide and
bactericide.

Easy to Use, Flexible to the Max

Double Nickel 55 WDG controls and suppresses fungal and bacterial diseases. Use it as a preventive or curative to treat diseases found on plant surfaces above and below the soil.

Multiple Modes of Action

Double Nickel deploys 5 modes of action. That makes Double Nickel ideal for use in resistance management programs. Plus, it is highly potent. That allows you to use lower and more economical application rates. Double Nickel. For conventionally or organically grown potatoes.

Double Nickel 55 controls:

Powdery mildew, *Botrytis* bacterial disorders, early blight, late blight, damping off and root or crown diseases caused by *Pythium*, *Rhizoctonia*, *Fusarium*, *Phytophthora* and more.
