A new solution
to control
nematodes for
increased yields.

MeloCon[®]

BIOLOGICAL NEMATOCIDE

Imagine.
A new solution
to control
nematodes for
increased yields.

MeloCon. A natural born killer of nematodes.

Nematodes can damage potato crops and devastate yields. Introduce them to MeloCon bionematicide.

MeloCon contains a powerful fungal parasite that annihilates nematodes. Applied to your soil, MeloCon spores collide with nematode eggs, juveniles and adults. The spores germinate, penetrate and consume the nematodes that threaten your yields.

Out of oxamyl? Try MeloCon. Studies show MeloCon performs better or at least equal to oxamyl.

MeloCon controls:

Root knot nematodes, sting nematodes, root lesion nematodes, stubby root nematodes, burrowing nematodes, reniform nematodes and more.

MeloCon is a registered trademark of Bayer CropScience. Always read and carefully follow label instructions. For mixing instructions, please refer to the application guide.
